Summary

Detail-oriented and improvement-driven Electronic Engineering student currently in Year 5 at University of Science and Technology, Zimbabwe, skilled in programming, using digital tools and documentation to support technical projects. Dedicated to continuous improvement, user-focused solutions, and ensuring high-quality outcomes in every task.

Work Experience

Regal Digital Solutions | Bulawayo Zimbabwe

Software Engineer

Mar.2023 - Aug.2023

Developed websites using the PHP framework Laravel and collaborated with a team on a native PHP web application. Contributed to backend development, database design, and system optimization to improve application performance. Focused on delivering scalable, maintainable code while meeting project deadlines and client requirements.

Education

National University Of Science and Technology | Bulawayo Zimbabwe

Digital Electronics

May.2020 - Present

Currently completing a Bachelor's degree in Electronic Engineering with a focus on digital electronics, programming, and electrical systems design. Developed strong technical skills through coursework, projects, and practical labs, with an emphasis on innovation, problem-solving, and digital system applications.

Harvard Online (edX)

Introduction to Computer Programming

Jun.2022 - Feb.2023

Completed a CS50x course covering core computer science and programming concepts. Strengthened problem-solving skills through hands-on projects involving algorithms, data structures, and basic web development, building a strong foundation for further technical growth.

Skills

- Skilled in frontend and backend web development with a solid foundation in object-oriented programming using Java, JavaScript, and C++.
- Fluent in English with strong communication and collaboration abilities, and a motivated interest in contributing to impactful and emerging technology solutions.
